# Slotted Semi metallic Disc Brake Pad Set Package Quantity 1 Set 4 Pieces Suitable for Both Light and Heavy Duty Vehicles

Our Product Introduction

## Basic Information

- Brand Name: ZKZB
- Model Number: ZK-11011

## Product Specification

- Dimensions: 120mm X 50mm X 15mm
- Position: Front
- Factory No: ZK-23008
- Friction Coefficient: 0.35 - 0.45
- Type: Brake Pad
- Interchange Part Number: D1293 D1222
- Package Quantity: 1 Set (4 Pieces)
- Quantity: 4 Pads Per Set

## Product Description

### Product Description:

The Disc Brake Pad Set is an essential component designed specifically for the front position of your vehicle's braking system. Engineered to deliver excellent stopping power, these brake pads ensure superior performance and safety every time you hit the brakes. Whether you are driving in city traffic or tackling steep descents, this set provides reliable and consistent braking performance, making it an indispensable upgrade for any vehicle owner seeking enhanced control and safety.

This particular brake pad set comes with four pads per set, perfectly suited for replacing both front wheels' brake pads simultaneously. This ensures balanced braking and optimal contact with the brake rotors, reducing wear and tear on other components and extending the overall lifespan of your braking system. The precise quantity of four pads per set makes installation straightforward and convenient, enabling you to maintain your vehicle's braking efficiency without hassle.

One of the standout features of this Disc Brake Pad Set is its composition using high-quality ceramic brake pads material. Ceramic brake pads have become increasingly popular in the automotive industry due to their numerous advantages over traditional organic or semi-metallic pads. They offer quieter operation, produce less brake dust, and maintain consistent friction levels across a wide range of temperatures. These qualities make ceramic brake pads an excellent choice for drivers who value both performance and cleanliness.

When it comes to choosing the best ceramic brake pads, this set ranks among the top options available in the market. Its superior engineering and materials ensure that it meets and exceeds OEM standards, specifically matching the OEM number 95025848. This guarantees compatibility and reliability, giving you peace of mind that the brake pads will fit perfectly and function as intended without compromising your vehicle's safety or braking dynamics.

The factory number ZK-23008 identifies this product in manufacturing and quality control processes, reflecting strict adherence to high production standards. This factory code ensures that each set undergoes rigorous testing and quality assurance measures before reaching consumers, so you can trust that you are getting a product built to last and perform under demanding conditions.

In addition to performance and quality, these disc brake pads are designed to reduce brake noise and vibration, common issues that often plague lower-quality brake pads. The ceramic materials and precise engineering minimize squealing and other unwanted sounds, contributing to a more comfortable and enjoyable driving experience. Furthermore, the reduced brake dust produced by ceramic pads helps keep your wheels cleaner, saving you time and effort on maintenance.

Installing this Disc Brake Pad Set will not only improve your vehicle's braking efficiency but also enhance overall safety. Excellent stopping power is crucial in emergency situations, and these pads deliver just that, allowing you to stop quickly and confidently. By choosing this set, you are investing in your vehicle's safety system with a product that balances performance, durability, and comfort.

In summary, this front-position Disc Brake Pad Set featuring four ceramic brake pads per set offers the best ceramic brake pads experience with excellent stopping power. Matching OEM number 95025848 and factory number ZK-23008, it guarantees quality, reliability, and compatibility. Whether you are replacing worn-out pads or upgrading your braking system, this set provides the perfect combination of performance, longevity, and noise reduction, making it an outstanding choice for any driver looking for top-tier disc brake pads.

### Features:

Product Name: Disc Brake Pad Set

Friction Coefficient: 0.35 - 0.45 for optimal braking performance

Manufacturer: Herito, known for high-quality automotive parts

Interchange Part Number: D1293, D1222 for easy replacement

OEM Number: 95025848 ensuring compatibility with original equipment

Dimensions: 120mm X 50mm X 15mm to fit a variety of brake systems

Made with ceramic brake pads, providing quieter and cleaner braking

Considered the best brake pad material for durability and performance

OEM brake pads quality assures reliable and safe braking experience

### Technical Parameters:

| | |
|---|---|
| Type | Brake Pad |
| Factory No | ZK-23008 |
| Color | Black |
| OEM | 95025848 |
| Interchange Part Number | D1293, D1222 |
| Manufacturer | Herito |
| Brake Type | Disc Brakes |
| Position | Front |
| Slotted | Yes |
| Material | Semi-metallic |

### Applications:

The ZKZB Disc Brake Pad Set, model number ZK-1101.1, is an excellent choice for those seeking the best ceramic brake pads for their

vehicles. Manufactured in China, this set includes 4 pads per set, specifically designed for front wheel positioning. With dimensions of 120mm x 50mm x 15mm, these brake pads fit a variety of standard disc brake systems, ensuring reliable and consistent performance. These brake pads are perfect for everyday driving as well as more demanding conditions, offering a friction coefficient ranging from 0.35 to 0.45. This range provides a balanced combination of stopping power, durability, and noise reduction, making them suitable for city driving, highway cruising, and even occasional spirited driving. Whether you are commuting to work, running errands, or embarking on a long road trip, the ZKZB brake pads ensure your vehicle responds precisely when you need it.

In addition to daily use, the ZKZB Disc Brake Pad Set is ideal for scenarios requiring enhanced safety and reliability, such as driving in wet or hilly terrains where effective braking is crucial. Their ceramic composition means less dust and quieter operation compared to traditional brake pads, providing a cleaner and more comfortable driving experience. For drivers who prioritize quality and performance, ZKZB stands out as the best brake pad brand, trusted for its consistent manufacturing standards and top-tier materials.

Mechanics and automotive enthusiasts will appreciate the ease of installation and compatibility of these good ceramic brake pads with a wide range of vehicle models. This makes them a practical choice for both professional workshops and DIY brake maintenance. Whether upgrading from standard brake pads or replacing worn components, the ZKZB Disc Brake Pad Set delivers dependable stopping power and long-lasting wear.

In summary, the ZKZB ZK-11011 brake pad set is suitable for various application occasions, including daily commuting, long-distance travel, and challenging driving conditions. Its superior friction coefficient, ceramic build, and thoughtful design make it one of the best ceramic brake pads available on the market today, ensuring safety, performance, and peace of mind for every driver.
