

F18/530/535 Bmw 5 Series Brake Pads Ceramic D1469/D1850 34216775346 Rear

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: BMW 5-seires Ceramic Brake Pad
- Model: F18/530/535
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-04043
- F/R: R
- FMSI: D1469/D1850
- OEM: 34216775346
- Braking System: TRW
- Highlight: **Rear bmw 5 series brake pads,
34216775346 bmw 5 series brake pads,
F18/530/535 bmw 5 series brake pads**

Product Description

Model: D1469/D1850 Part Number: 34216775346 Application: Rear Axle These ceramic brake pads for the BMW 5-Series are designed for high-performance vehicles, ensuring superior stopping power and control. Their high wear resistance makes them ideal for high-speed driving.

Specifications	
Product name	BMW 5-series Ceramic Brake Pad
Model	F18/530/535
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-04043
FMSI	D1469/D1850
OEM	34216775346
Braking System	TRW
Size	
Width	116.1mm
Height	65.6mm
Height 1	72.6mm
Thickness	17.1mm
Model_MARKE	BMW 5 Series Sedan (F10) 2010/03-BMW 5
	Touring (F11) 2010/04-2011/12 BMW 6
	Convertible (F12) 2011/03-BMW 6
	Coupe (F13) 2010/11-/BMW 550i
	2011-2015/New BMW 730 Rear

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
