

Lexus LS460 Ceramic Brake Pad D1282 , Advics Braking System OEM 04465-0W110

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Lexus LS460 Ceramic Brake Pad
- Model: LS460
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-17001
- F/R: F
- FMSI: D1282
- OEM: 04465-0W110
- Braking System: Advics
- Highlight: **Advics ceramic brake pad,
04465-0W110 ceramic brake pad,
OEM ceramic brake pad**

Product Description

The ceramic brake pads for the Lexus LS460, model D1282, part number 04465-0W110, designed for the front axle, offer the advanced braking performance required by luxury vehicles. Their high-end materials and precision engineering ensure a smooth braking experience at any speed.

Specifications	
Product name	Lexus LS460 Ceramic Brake Pad
Model	LS460
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-17001
FMSI	D1282
OEM	04465-0W110
Braking System	Advics
Size	
Width	133.6mm
Height	88mm
Thickness	18.3mm
Model_MARKE	Lexus LS460(USF40/USF41)2006/04-

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
