

Nissan Almera B15/N16 Ceramic Brake Pad AKB Braking System 41060-6N091

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Nissan Almera B15/N16 Ceramic Brake Pad
- Model: Nissan Almera B15/N16
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-22011
- F/R: F
- FMSI: D1193
- OEM: 41060-6N091
- Braking System: AKB
- Highlight: Nissan Almera ceramic brake pad,
AKB ceramic brake pad,
41060-6N091 ceramic brake pad

Product Description

| Specifications | |
|----------------|--|
| Product name | Nissan Almera B15/N16 Ceramic Brake Pad |
| Model | Nissan Almera B15/N16 |
| Type | Brake Pad |
| Material | Ceramic |
| F/R | F |
| Factory No. | ZK-22011 |
| FMSI | D1193 |
| OEM | 41060-6N091 |
| Braking System | AKB |
| Size | |
| Width | 135mm |
| Height | 48.4mm |
| Thickness | 15.4mm |
| Model_MARKE | Nissan Almera B15/N16/Almera 2.0L (03-04 model). |

Upgrade your Nissan Almera B15/N16's braking system with our top-of-the-line ceramic brake pads. Our D1193 model is designed to offer exceptional stopping power, ensuring safety and confidence on the road. These brake pads are crafted with a high-quality ceramic formula that reduces brake dust and noise, providing a cleaner and quieter driving experience. With the OE reference number 41060-6N091, you can trust in the precise fit and compatibility with your vehicle. Choose our ceramic brake pads for a durable, reliable, and high-performance braking solution.

Remember to verify the accuracy of the product details with the actual specifications to ensure a perfect match.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
