

## Nissan CEFIRO A33 Rear Ceramic Brake Pads D900 , 44060-4U092

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Nissan CEFIRO A33 Ceramic Brake Pad
- Model: CEFIRO A33
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-22004
- F/R: R
- FMSI: D900
- OEM: 44060-4U092
- Braking System: TKO
- Highlight: **Nissan CEFIRO A33 ceramic brake pads ,  
Nissan CEFIRO A33 rear ceramic brake pads ,  
44060-4U092**

Specifications	
Product name	Nissan CEFIRO A33 Ceramic Brake Pad
Model	CEFIRO A33
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-22004
FMSI	D900
OEM	44060-4U092
Braking System	TKO
Size	
Width	105.54mm
Height	43mm
Thickness	15.9mm
Model_MARKE	Nissan Bluebird (new model)/CEFIRO A33
	Bluebird EQ7202 (03 model)/Bluebird generations 2 and 3
	Bluebird Zhi Zun/Almera 2.0/Mazda RX7

Ensure the safety and performance of your Nissan CEFIRO A33 with our high-quality ceramic brake pads. Our D900 model brake pads are designed to provide optimal stopping power, durability, and noise reduction. The precise engineering matches OE reference 44060-4U092, guaranteeing a perfect fit for your vehicle. These brake pads are made from advanced ceramic materials that offer excellent braking performance in various driving conditions, ensuring a smoother and more responsive braking experience. Trust our brake pads to deliver reliability and peace of mind every time you hit the road. Please make sure to confirm the compatibility with your vehicle model before purchasing.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition. The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality. Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions. Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products. Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues. Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution. Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance. Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety. Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance. Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels. Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
