

Honda 8th Accord Ceramic Brake Pad D1336/D1451 , 43022-TA0-A00

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Honda 8th Accord Ceramic Brake Pad
- Model: 8th Accord
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-07004
- F/R: R
- FMSI: D1336/D1451
- OEM: 43022-TA0-A00
- Braking System: N
- Highlight: 43022-TA0-A00 ceramic brake pad,
Honda 8th ceramic brake pad, 43022-TA0-A00

Product Description

Specifications	
Product name	Honda 8th Accord Ceramic Brake Pad
Model	8th Accord
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-07004
FMSI	D1336/D1451
OEM	43022-TA0-A00
Braking System	N
Size	
Width	93.2mm
Height	46.5mm
Thickness	14.7mm
Model_MARKE	Honda 08 Accord Eighth Generation/08 Accord/Spirior/
	BYD F6 1.8/2.0/2.4 (labeled as 08 Accord afterward)/ELYSION

Elevate your Honda 8th Accord's braking capabilities with our premium ceramic brake pads, designed to fit seamlessly with models D1336/D1451. These pads are engineered to meet the exacting standards of part number 43022-TA0-A00, ensuring compatibility and performance. Our ceramic brake pads reduce noise and dust, providing a cleaner, quieter driving experience. They also offer enhanced durability and superior stopping power, giving you confidence in every braking situation. Trust in our brake pads for a safer and more enjoyable journey.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
