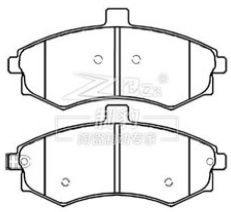
Hyundai Elantra, Ceramic Brake Pad, D941, 58101-2DA30, F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million



Product Specification

- Product Name: Hyundai Elantra Ceramic Brake Pad
- Model: Elantra/Elantra New
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-28001
- F/R: F
- FMSI: D941
- OEM: 58101-2DA30
- Braking System: Mando
- Highlight: **58101-2da30 ceramic brake pad**, **58101-2da30 ceramic brake pads**

Product Description

Specifications	
Product name	Hyundai Elantra Ceramic Brake Pad
Model	Elantra/Elantra New
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-28001
FMSI	D941
OEM	58101-2DA30
Braking System	Mando
Size	
Width	137mm
Height	63.4mm
Thickness	16.8mm
Model_MARKE	Hyundai Elantra 1.6L/1.8L (-07 pre)/Sailutu/JAC Heyue/Oumeijia

Hyundai Elantra Ceramic Brake Pads (D941, 58101-2DA30, Front)
Enhance your Hyundai Elantra's braking performance with our premium ceramic brake pads. The D941 model is designed for the front brakes, providing superior stopping power with reduced noise and brake dust. The part number 58101-2DA30 ensures these pads are a perfect match for your Elantra, offering easy installation and a precise fit.
Our ceramic brake pads are engineered for longevity and consistent performance, ensuring your safety on every journey. The 'F' designation indicates these pads are for the front brakes, crucial for your vehicle's stopping capabilities. Trust in our high-quality brake pads to deliver a smoother, more responsive braking experience for your Hyundai Elantra.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
