

## Mercedes benz C63 AMG 2016 Ceramic Brake Pad D1873 , 000 420 47 00

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Mercedes Benz C63 AMG 2016 Ceramic Brake Pad
- Model: C63 AMG 2016
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-03057
- F/R: F
- FMSI: D1873
- OEM: 000 420 47 00
- Braking System: N
- Highlight: 000 420 47 00 ceramic brake pad,  
C63 AMG 2016 ceramic brake pad,  
C63 mercedes benz front brake pads

## Product Description

Specifications	
Product name	Mercedes benz C63 AMG 2016 Ceramic Brake Pad
Model	C63 AMG 2016
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-03057
FMSI	D1873
OEM	000 420 47 00
Braking System	N
Size	
Width	206mm
Height	86.9mm
Thickness	15.3mm
Model_MARKE	N

**The ceramic brake pads for the 2016 Mercedes-Benz C63 AMG, model D1873, part number 000 420 47 00, are designed to meet the demands of high-performance vehicles. Capable of withstanding extreme braking temperatures, they provide immediate and consistent braking response, perfect for drivers seeking an intense driving experience.**

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
