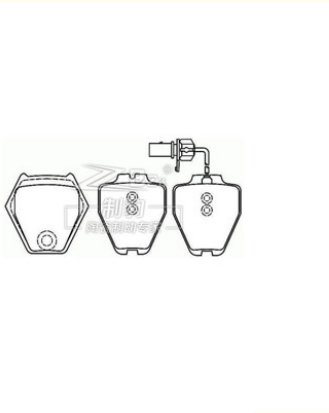
D839 Audi A8 Front Brake Pads 4B0698151S Front Brake Pad Replacement

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million



Product Specification

- Product Name: Audi A8 Ceramic Brake Pad
- Model: Audi A8
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-02010
- F/R: F
- FMSI: D839
- OEM: 4B0698151S
- Braking System: Lucas
- Highlight: **4B0698151S audi a8 front brake pads**, **4B0698151S front brake pad replacement**, **4B0698151S**

Product Description

Specifications	
Product name	Audi A8 Ceramic Brake Pad
Model	Audi A8
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-02010
FMSI	D839
OEM	4B0698151S
Braking System	Lucas
Size	
Width	63.2mm
Height	75.2mm
Thickness	17.5mm
Model_MARKE	Audi A8 V8 Import/Audi A8 V8 (8-piece square head alarm line)

Optimize Your Audi A8's Braking with Our Elite Ceramic Brake Pads
Elevate your Audi A8's driving experience with our superior ceramic brake pads. Our model**D839** is meticulously crafted to fit the front brakes of your vehicle, ensuring compatibility with the OEM part number **4B0698151S**.
Key Advantages:
Premium Ceramic Composition: Benefit from a significant reduction in brake dust and noise, while enjoying enhanced stopping power.
Precision Engineered: Each pad is designed to meet the exact specifications of your Audi A8, guaranteeing a perfect fit and optimal performance.
Heat Resistant: Our pads are built to withstand high temperatures, providing consistent braking power in various driving conditions.
Safety Certified: Undergoes rigorous testing to meet the highest safety standards, so you can drive with confidence.
For the discerning Audi A8 owner, our ceramic brake pads are the ideal choice for maintaining the perfect balance between performance and elegance.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
