

## Chevrolet Aveo, Ceramic Brake Pad, D1702, 95025848, F

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Chevrolet Aveo Ceramic Brake Pad
- Model: Aveo
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-27017
- F/R: F
- FMSI: D1702
- OEM: 95025848
- Braking System: N
- Silent Design: Chamfer Design
- Highlight: **95025848 ceramic brake pad, 95025848 ceramic brake pads**

## Product Description

Specifications	
Product name	Chevrolet Aveo Ceramic Brake Pad
Model	Aveo
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-27017
FMSI	D1702
OEM	95025848
Braking System	N
Size	
Width	142.2mm
Height	53.6mm
Thickness	16.7mm
Model_MARKET	Chevrolet Aveo

### Enhance Your Kia Borrego's Safety with Premium Ceramic Parking Brake Shoes (S970, 58350-2JA00)

Ensure your Kia 2009 Borrego remains securely parked on any terrain with our high-quality ceramic brake shoes. Designed specifically for parking brakes, our S970 model offers a perfect blend of durability and performance. The part number 58350-2JA00 signifies a genuine fit for your Borrego, providing you with a reliable and long-lasting solution.

Crafted from superior ceramic materials, these brake shoes deliver outstanding stopping power without the noise and dust associated with traditional brakes. They are ideal for maintaining the safety and integrity of your vehicle's parking brake system. Trust in the precision engineering of our ceramic brake shoes to keep your Kia Borrego stationary when it matters most.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
