

## Fiat 500, Ceramic Brake Pad, D1569, 6808-8919-AA, R

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

#### Product Specification

- Product Name: Fiat 500 Ceramic Brake Pad
- ModTouareg SUV(7LA)el: 500
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-30009
- F/R: R
- FMSI: D1569
- OEM: 6808-8919-AA
- Braking System: Citroen
- Highlight: **6808-8919-aa ceramic brake pad ,  
6808-8919-aa ceramic brake pads ,  
fiat 500 ceramic brake pad**

## Product Description

The ceramic brake pads for the Fiat 500, model D1569, part number 6808-8919-AA, designed for the rear axle, provide excellent braking performance and durability for this compact car. Their design balances performance and economy, suitable for urban driving and daily commuting.

Specifications	
Product name	Fiat 500 Ceramic Brake Pad
Model	500
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-30009
FMSI	D1569
OEM	6808-8919-AA
Braking System	Citroen
Size	
Width	95.8mm
Height	43.9mm
Thickness	13.8mm
Model_MARKE	Fiat 500(2012-2013)

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
