

Buick Excelle ,Ceramic Brake Pad,D1035,96405129,F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Buick Excelle Ceramic Brake Pad
- Model: Buick Excelle
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-06006
- F/R: F
- FMSI: D1035
- OEM: 96405129
- Braking System: AKB
- Highlight: **96405129 ceramic brake pad,**
96405129 ceramic brake pads,
buick excelle ceramic brake pad

Product Description

Specifications	
Product name	Buick Excelle Ceramic Brake Pad
Model	Buick Excelle
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-06006
FMSI	D1035
OEM	96405129
Braking System	AKB
Size	
Width	143 mm
Height	51.5 mm
Thickness	16.9mm
Model_MARKE	Buick Excelle 1.6/1.8 (03/04/05 models)/ Excelle HRV Wagon 05 model/ Excelle (-08)/ Chevrolet Epica Old model (06 model)/ Daewoo Magnus/ Magnus Noble/ Magnus Besturn

Optimize Your Buick Excelle's Braking with Our D1035 Ceramic Brake Pads

Elevate your Buick Excelle's braking system with our premium ceramic brake pads. Our **D1035** model is meticulously engineered to fit your Buick Excelle seamlessly, ensuring effortless installation and exceptional performance. The part number **96405129** guarantees that you're getting a product tailored to meet OEM standards and compatibility with your vehicle.

Our ceramic brake pads are designed to produce minimal brake dust and noise, providing a cleaner and quieter driving experience. They offer a stable, responsive braking feel, giving you confidence in your vehicle's safety and handling.

For a reliable, high-quality braking solution that enhances your Buick Excelle's performance, trust our ceramic brake pads.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
