

## Front Ceramic Ford Escape Brake Pads D1047 AM6Z-2001-A car brake pad

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Ford Escape Ceramic Brake Pad
- Model: Ford Escape
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-10010
- F/R: F
- FMSI: D1047
- OEM: AM6Z-2001-A
- Braking System: N
- Highlight: Front Ceramic car brake pad,  
AM6Z-2001-A ford escape brake pads,  
AM6Z-2001-A

## Product Description

Specifications	
Product name	Ford Escape Ceramic Brake Pad
Model	Ford Escape
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-10010
FMSI	D1047
OEM	AM6Z-2001-A
Braking System	N
Size	
Width	170.5 mm
Height	67.5 mm
Thickness	15 mm
Model_MARKE	Ford Escape (US version) 2004/ Mazda S7/ Haima S7

### Enhance Your Ford Escape's Braking Performance with Premium Ceramic Brake Pads

Upgrade your Ford Escape's safety and driving experience with our top-of-the-line ceramic brake pads. Designed specifically for the Ford Escape, our brake pads provide superior stopping power without the noise and dust associated with traditional pads. The **D1047** model is engineered to match the exact specifications of your vehicle, ensuring a perfect fit and hassle-free installation.

Our brake pads feature advanced ceramic compounds that deliver a consistent, responsive pedal feel from the first stop to the last. Whether you're navigating city streets or taking on rugged terrain, you can trust our brake pads to perform. Plus, with the **AM6Z-2001-A** part number, you can be confident in the quality and reliability that comes with OEM standards.

Don't compromise on quality. Choose our ceramic brake pads for your Ford Escape and enjoy peace of mind with every journey.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
