Buick Firstland Disc Brake Pad Set Ceramic D1075 88964099 Front Brake Pad Replacement

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Buick Firstland Ceramic Brake Pad
- Model: Buick Firstland
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-06003
- F/R: F
- FMSI: D1075
- OEM: 88964099
- Braking System: N
- Highlight: **Buick Firstland ceramic brake pad**, **Buick Firstland Disc Brake Pad Set**, **88964099**

Product Description

Buick Firstland ,Ceramic Brake Pad,D1075,88964099,F

Specifications	
Product name	Buick Firstland Ceramic Brake Pad
Model	Buick Firstland
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-06003
FMSI	D1075
OEM	88964099
Braking System	N
Size	
Width	147.7mm
Height	57 mm
Thickness	16.8 mm
Model_MARKE	Firstland/ LaCrosse

The Ford Escape Ceramic Brake Pad, model D1047, part number AM6Z-2001-A, is a premium quality brake pad designed specifically for Ford Escape owners who demand superior braking performance and extended lifespan. Manufactured with advanced ceramic materials, this brake pad delivers consistent stopping power across various driving conditions while minimizing brake dust to keep your wheels clean. Its low-noise design ensures a comfortable driving experience, and the exceptional heat resistance guarantees safety during high-speed driving or emergency braking.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.
The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.
Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.
Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.
Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.
Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.
Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.
Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.
Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.
Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.
Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
