

Subaru Tribeca Ceramic Brake Pad D1078 26296-AG000 Front Ceramic Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T,LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Subaru Tribeca Ceramic Brake Pad
- Model: Subaru Tribeca
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-24006
- F/R: F
- FMSI: D1078
- OEM: 26296-AG000
- Braking System: Akebono
- Highlight: **Subaru Tribeca Ceramic Brake Pad, Akebono Front Ceramic Brake Pads, 26296-AG000**

Product Description

Subaru Tribeca ,Ceramic Brake Pad,D1078,26296-AG000,F

Specifications	
Product name	Subaru Tribeca Ceramic Brake Pad
Model	Subaru Tribeca
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-24006
FMSI	D1078
OEM	26296-AG000
Braking System	Akebono
Size	
Width	156.9 mm
Height	63.5 mm
Thickness	17.0 mm
Model_MARKE	Fuji Subaru Impreza/ Legacy/ Dongfeng Nissan Fuga/ 2014 Legacy/ 2015 Outback

The Subaru Tribeca Ceramic Brake Pad, model D1078, part number 26296-AG000, is engineered for Subaru Tribeca owners who seek outstanding braking performance and longevity. Constructed with premium ceramic materials, this brake pad ensures consistent stopping power under various driving conditions while minimizing brake dust, keeping the wheels clean. The low-noise design offers a quiet and comfortable driving experience, and the superior heat resistance ensures safety during high-speed travel or in emergency braking situations.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
