

2009 Honda CRV Brake Pads D1089 , 45022-SHJ-A50 front ceramic pads

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: 2009 Honda CR-V Ceramic Brake Pad
- Model: 2009 Honda CR-V
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-07003
- F/R: F
- FMSI: D1089
- OEM: 45022-SHJ-A50
- Braking System: Sumitomo
- Highlight: **45022-SHJ-A50 front ceramic pads ,
45022-SHJ-A50 honda crv brake pads ,
2009 front ceramic pads**

Product Description

Specifications	
Product name	2009 Honda CR-V Ceramic Brake Pad
Model	2009 Honda CR-V
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-07003
FMSI	D1089
OEM	45022-SHJ-A50
Braking System	Sumitomo
Size	
Width	154.9 mm
Height	58.2 mm
Thickness	17.9 mm
Model_MARKET	2008 Honda/ New CR-V (labeled as 09 model pre-facelift)/ Changan CX75/ CS75/ Crosstour/ Elysion/ 2016 Haval H6 (blue label)

The 2009 Honda CR-V Ceramic Brake Pad, model D1089, part number 45022-SHJ-A50, is crafted for Honda CR-V owners who demand high-performance braking and enduring reliability. Made with advanced ceramic materials, these brake pads offer superior stopping power across various driving conditions while reducing brake dust to keep your wheels pristine. The low-noise design ensures a quiet and comfortable ride, and the exceptional heat resistance provides added safety during high-speed driving or emergency stops.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
