

Escalade Ceramic Brake Pads D1092 , 89059119 Front Brake Pad Replacement

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T,LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Escalade Ceramic Brake Pad
- Model: Escalade
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-16005
- F/R: F
- FMSI: D1092
- OEM: 89059119
- Braking System: N
- Highlight: Escalade ceramic brake pads,
Escalade front brake pad replacement,
89059119 ceramic brake pads

Product Description

Specifications	
Product name	Escalade Ceramic Brake Pad
Model	Escalade
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-16005
FMSI	D1092
OEM	89059119
Braking System	N
Size	
Width	184.3 mm
Height	64.2 mm
Thickness	18 mm
Model_MARKE	Cadillac/ Escalade/ SRX

Upgrade the braking system of your Cadillac Escalade with our D1092 ceramic brake pads. These pads are made from premium ceramic materials, offering exceptional braking performance and heat resistance to ensure safe stopping under various driving conditions. Designed to perfectly fit Escalade models, our brake pads with part number 89059119 are easy to install and low in maintenance. Whether it's urban driving or off-road adventures, our ceramic brake pads are the ideal choice for your vehicle.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
