

## D1093 88964099 Rear Ceramic Brake Pads Buick Firstland for vehicle

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Buick Firstland Ceramic Brake Pad
- Model: Buick Firstland
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-06004
- F/R: R
- FMSI: D1093
- OEM: 88964099
- Braking System: N
- Highlight: **Buick Firstland ceramic brake pad,  
Buick Firstland rear ceramic brake pads,  
88964099 ceramic brake pad**

## Product Description

Buick Firstland,Ceramic Brake Pad,D1093,88964099,R

Specifications	
Product name	Buick Firstland Ceramic Brake Pad
Model	Buick Firstland
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-06004
FMSI	D1093
OEM	88964099
Braking System	N
Size	
Width	125 mm
Height	51.6 mm
Thickness	14.1 mm
Model_MARKE	2008 Buick GL8 Firstland 3.0L/ 2008 LaCrosse 2.4L/ 3.0L

**The Buick Firstland Ceramic Brake Pad, model D1093, is a high-quality braking component designed for vehicle owners who demand superior braking performance and longevity. Made with advanced ceramic materials, it delivers consistent stopping power under various driving conditions, while minimizing noise and dust during braking to enhance the driving experience. With the part number 88964099, it is perfectly suited for the Buick Firstland series and serves as an ideal replacement for original factory parts. Whether navigating through city streets or traversing rugged mountain paths, the Buick Firstland Ceramic Brake Pad ensures reliable safety.**

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
