

## LUCAS Land Rover Discovery 3 Front Ceramic Brake Pads D1098 , SEE500020

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Land Rover Discovery 3 Ceramic Brake Pad
- Model: Land Rover Discovery 3
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-18002
- F/R: F
- FMSI: D1098
- OEM: SEE500020
- Braking System: LUCAS
- Highlight: **SEE500020 front ceramic brake pads ,  
Land Rover Discovery 3 brake pads , SEE500020**

## Product Description

Specifications	
Product name	Land Rover Discovery 3 Ceramic Brake Pad
Model	Land Rover Discovery 3
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-18002
FMSI	D1098
OEM	SEE500020
Braking System	LUCAS
Size	
Width	162.6 mm
Height	58.7 mm
Thickness	17.4 mm
Model_MARKE	2004 Land Rover Discovery 3/ 2005 Land Rover Range Rover

**The Land Rover Discovery 3 Ceramic Brake Pads, model D1098, SEE500020, are tailor-made for Land Rover Discovery 3 owners who demand exceptional performance. Crafted with advanced ceramic materials, these brake pads ensure consistent and powerful braking in all driving conditions. The low-dust formula not only minimizes brake dust but also significantly reduces wear on the braking system, extending its lifespan. The SEE500020 brake pads meet Land Rover's original specifications, guaranteeing a perfect fit for your Discovery 3, with easy installation and maintenance. Whether for urban driving or off-road adventures, these brake pads are an indispensable choice for your vehicle.**

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
