

## Toyota Reiz Ceramic Brake Pad D1113 04466-22190 Rear Ceramic Brake Pads

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Toyota Reiz Ceramic Brake Pad
- Model: Toyota Reiz
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-11013
- F/R: R
- FMSI: D1113
- OEM: 04466-22190
- Braking System: N
- Highlight: **Toyota Reiz Ceramic Brake Pad,  
Ceramic Brake Pad D1113, 04466-22190**

## Product Description

Specifications	
Product name	Toyota Reiz Ceramic Brake Pad
Model	Toyota Reiz
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-11013
FMSI	D1113
OEM	04466-22190
Braking System	N
Size	
Width	88 mm
Height	58.5 mm
Thickness	15.5 mm
Model_MARKE	Toyota Reiz 2.5L/ 3.0L (2005-2009)/ Domestic New Crown 2.5L/ 3.0L (2005-2009)/ Hongqi HQ3/ Lexus GS300 (2006 model)/ Lexus GS430 (2006 model)

**The Toyota Reiz Ceramic Brake Pads, model D1113, OEM part number 04466-22190, are engineered for Toyota Reiz owners who seek an ultimate driving experience. These brake pads are made from a premium ceramic composite material that ensures stability and durability during high-speed braking. The optimized friction coefficient not only delivers exceptional stopping power but also significantly reduces noise and brake dust, enhancing driving comfort. The 04466-22190 brake pads meet Toyota's stringent OEM standards, ensuring perfect compatibility with your Reiz model, with easy installation and low maintenance costs. Whether it's for daily commuting or long-distance travel, these brake pads provide a safe and reliable performance.**

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
