

New Lexus IS350/ Lexus Gs 350 Front Brake Pads Ceramic D1118 04465-30410

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: New Lexus IS350/ Lexus GS Ceramic Brake Pad
- Model: New Lexus IS350/ Lexus GS
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-17005
- F/R: F
- FMSI: D1118
- OEM: 04465-30410
- Braking System: Advics
- Highlight: 04465-30410 lexus gs 350 front brake pads, 04465-30410 front brake pads, 04465-30410

Product Description

| Specifications | |
|----------------|--|
| Product name | New Lexus IS350/ Lexus GS Ceramic Brake Pad |
| Model | New Lexus IS350/ Lexus GS |
| Type | Brake Pad |
| Material | Ceramic |
| F/R | F |
| Factory No. | ZK-17005 |
| FMSI | D1118 |
| OEM | 04465-30410 |
| Braking System | Advics |
| Size | |
| Width | 118.5 mm |
| Height | 77.7 mm |
| Thickness | 17.3 mm |
| Model_MARKE | Lexus GS250 (2012/03-)/ Lexus GS450 (2005/04-) |

The new Ceramic Brake Pads for the Lexus IS350 and GS series, model D1118, part number 04465-30410, are tailored for owners seeking superior braking performance and lower noise levels. These high-quality brake pads are made with advanced ceramic materials to ensure consistent stopping power under all driving conditions. Whether navigating busy city streets or cruising on the highway, they deliver excellent braking response and extended lifespan, enhancing your driving experience with added safety and comfort.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
