

2010 Touareg V6 3.0T Ceramic front Brake Pad Replacement D1129 7L6698151E

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: 2010 Touareg V6 3.0T Ceramic Brake Pad
- Model: 2010 Touareg V6 3.0T
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-05001
- F/R: F
- FMSI: D1129
- OEM: 7L6698151E
- Braking System: Brembo
- Highlight: **7L6698151E front brake pad replacement,
Touareg V6 3.0T front brake pad replacement,
7L6698151E**

Product Description

Specifications	
Product name	2010 Touareg V6 3.0T Ceramic Brake Pad
Model	2010 Touareg V6 3.0T
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-05001
FMSI	D1129
OEM	7L6698151E
Braking System	Brembo
Size	
Width	131.8 mm
Height	77.3 mm
Thickness	15.9 mm
Model_MARKE	Touareg SUV (7LA) 2002/10-2010/05/ Touareg (7P5) 2010/01-

The Ceramic Brake Pads designed for the 2010 Touareg V6 3.0T, model D1129, part number 7L6698151E, cater to owners who demand the ultimate driving experience. Made with premium ceramic composite materials, these brake pads maintain exceptional braking performance and durability even under high temperatures. Their low wear rate and shock-absorbing properties significantly reduce driving noise, offering a smoother ride. Whether on urban streets or rugged mountain paths, these brake pads ensure your safety, making every stop precise and dependable.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
