

98735293901 Rear Car Brake Pad Replacement Porsche (987) Ceramic Brake Pad D1134

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Porsche (987) Ceramic Brake Pad
- Model: Porsche (987)
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-05012
- F/R: R
- FMSI: D1134
- OEM: 98735293901
- Braking System: Brembo
- Highlight: **98735293901 car brake pad,**
98735293901 car brake pad replacement,
Porsche (987) ceramic brake pad

Product Description

Specifications	
Product name	Porsche (987) Ceramic Brake Pad
Model	Porsche (987)
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-05012
FMSI	D1134
OEM	98735293901
Braking System	Brembo
Size	
Width	112 mm
Height	73 mm
Thickness	15.5mm
Model_MARKE	Cayman 2006, 2008, 2009, 2010, 2011/ Cayman S/ Boxster 2000, 2009, 2010, 2011/ 911 2005

Porsche (987) High-Performance Ceramic Brake Pads (D1134, 98735293901)

Discover the ultimate braking solution for your Porsche (987) with our state-of-the-art ceramic brake pads. Our D1134 pads, part number 98735293901, are meticulously engineered to provide exceptional stopping power, unparalleled durability, and a whisper-quiet braking experience.

Features:

Superior Stopping Power: Enjoy the confidence of enhanced braking performance in all driving conditions.

Ultra-Low Dust: Keep your wheels clean with our advanced low-dust technology.

Noise-Free Braking: Say goodbye to brake squeal thanks to our noise-cancelling design.

Perfect Fit: Designed specifically for the Porsche (987), ensuring a seamless installation.

Elevate your driving experience with our premium ceramic brake pads, tailored for the discerning Porsche enthusiast.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
