## Suzuki Grand Vitara Ceramic Disc Brake Pads D1188 55200-65J00 Front Ceramic Pads

## **Basic Information**

- Place of Origin:
- Brand Name:
- Certification:
- Model Number:
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability:

## **Product Specification**

• Product Name: Suzuki Grand Vitara Ceramic Brake Pad Model: Suzuki Grand Vitara Brake Pad • Type: Ceramic • Material: ZK-44007 • Factory No.: • F/R: F • FMSI: D1188 55200-65J00 • OEM: • Braking System: TKO • Highlight: TKO Ceramic Disc Brake Pads, Suzuki Grand Vitara Front Ceramic Pads, 55200-65J00

Suzuki Grand Vitara, Ceramic Brake Pad, D1188, 55200-65J00, F

	Specifications				
Product name	Suzuki Grand Vitara Ceramic Brake Pad				
Model	Suzuki Grand Vitara				
Туре	Brake Pad				
Material	Ceramic				
F/R	F				
Factory No.	ZK-44007				
FMSI	D1188				
OEM	55200-65J00				
Braking System	ТКО				
	Size				
Width	138 mm				
Height	54.7 mm				
Thickness	16 mm				
	Grand Vitara SUV 2005/04-

Suzuki Grand Vitara Ceramic Brake Pads, model D1188, part number 55200-65J00, are specifically designed for the front axle, measuring 138mm in width, 54.7mm in height, and 16mm in thickness. Made from high-quality ceramic material, these brake pads offer exceptional braking performance and durability. Their high-temperature stability and resistance to thermal degradation ensure consistent braking response across various driving conditions. The ceramic composition also helps reduce brake dust production, keeping the wheels clean and lowering noise levels for improved driving comfort.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
