

## Mazda 8 front ceramic pads D1258 L2Y6-33-23Z Bosch Braking System

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

#### Product Specification

- Product Name: Mazda 8 Ceramic Brake Pad
- Model: Mazda 8
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-20007
- F/R: F
- FMSI: D1258
- OEM: L2Y6-33-23Z
- Braking System: N
- Highlight: **Mazda 8 front ceramic pads ,  
L2Y6-33-23Z front ceramic pads,  
Mazda 8 Disc Brake Pad Set**

## Product Description

| Specifications |   |
|----------------|---|
| Product name   | Mazda 8 Ceramic Brake Pad   |
| Model          | Mazda 8   |
| Type           | Brake Pad   |
| Material       | Ceramic   |
| F/R            | F   |
| Factory No.    | ZK-20007  |
| FMSI           | D1258   |
| OEM            | L2Y6-33-23Z   |
| Braking System | Bosch   |
| Size           |   |
| Width          | 138.9 mm  |
| Height         | 57.9 mm   |
| Thickness      | 17.4 mm   |
| Model_MARKE    | Mazda8/ Mazda CX-7 (07-09 models)/ Atzda/ Jinchang (with perforated brakes) |

**The Mazda 8 Ceramic Brake Pads, model D1258, part number L2Y6-33-23Z, provide a solid foundation for your driving safety. Made with advanced ceramic materials, these brake pads ensure stable braking performance under various driving conditions. Their low wear and noise characteristics offer a more comfortable driving experience while reducing wear on the brake discs, extending the overall life of the braking system. Additionally, the eco-friendly design of the ceramic brake pads reduces the emission of harmful substances, meeting modern automotive environmental standards.**

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
