

## 96626070 Chevrolet Captiva Front Ceramic Brake Pads sets D1264

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

#### Product Specification

- Product Name: Chevrolet Captiva Ceramic Brake Pad
- Model: Chevrolet Captiva
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-27003
- F/R: F
- FMSI: D1264
- OEM: 96626070
- Braking System: Mando
- Highlight: **96626070, Chevrolet Captiva ceramic brake pad, Chevrolet Captiva front ceramic brake pads**

## Product Description

Specifications	
Product name	Chevrolet Captiva Ceramic Brake Pad
Model	Chevrolet Captiva
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-27003
FMSI	D1264
OEM	96626070
Braking System	Mando
Size	
Width	149 mm
Height	62 mm
Thickness	16.5 mm
Model_MARKE	Chevrolet Captiva 2.4L (2007 model)/ Captiva 3.2L (2010 model)/ Opirus/ Carnival VQ

Ceramic Brake Pads specifically designed for the Chevrolet Captiva, model D1264, part number 96626070, are made from high-quality ceramic materials to ensure stability and safety during braking. These brake pads are engineered to offer an ultra-low wear rate and reduce braking noise while keeping the braking system clean. Suitable for Chevrolet Captiva Sport models from 2012 to 2015, they provide reliable braking performance for both city driving and long-distance journeys.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
