

Nissan Civilian Minibus (8-Seater) Front Ceramic Brake Pads D1265 , MK449108

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Nissan Civilian Minibus Ceramic Brake Pad
- Model: Nissan Civilian Minibus
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-22008
- F/R: F
- FMSI: D1265
- OEM: MK449108
- Braking System: SUM
- Highlight: **MK449108 front ceramic brake pads,**
MK449108 ceramic brake pads,
MK449108 ceramic brake pad

Product Description

Specifications	
Product name	Nissan Civilian Minibus (8-seater) Ceramic Brake Pad
Model	Nissan Civilian Minibus (8-seater)
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-22008
FMSI	D1265
OEM	MK449108
Braking System	SUM
Size	
Width	139.1 mm
Height	59 mm
Thickness	19.4 mm
Model_MARKE	Nissan Civilian Minibus (8-seater)

The Ceramic Brake Pad, model D1265, OEM part number MK449108, F, is an excellent choice designed for the high-performance braking system of the Nissan Civilian Minibus (8-seater). Made with advanced ceramic formulas, it provides consistent braking performance and a longer lifespan even under extreme temperatures. The unique composition of materials ensures reduced brake noise and significantly less brake dust, keeping the wheels cleaner. Whether navigating through city traffic or on long journeys, drivers of the Nissan Civilian Minibus can rely on these brake pads for a smooth and dependable driving experience.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
