

Chevrolet Lova Ceramic Brake Pad D1269 96534653 Front Ceramic Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Chevrolet Lova Ceramic Brake Pad
- Model: Chevrolet Lova
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-27001
- F/R: F
- FMSI: D1269
- OEM: 96534653
- Braking System: AKB
- Highlight: **96534653 ceramic brake pad,**
96534653 front ceramic pads, 96534653

Product Description

Specifications	
Product name	Chevrolet Lova Ceramic Brake Pad
Model	Chevrolet Lova
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-27001
FMSI	D1269
OEM	96534653
Braking System	AKB
Size	
Width	133 mm
Height	48.87 mm
Thickness	16.9 mm
Model_MARKE	2005.7- Lechi

The Ceramic Brake Pad for Chevrolet Lova, model D1269, OEM part number 96534653, F, is the perfect match for the high-performance braking system tailored for Chevrolet Lova. Crafted from superior ceramic materials, it ensures exceptional braking performance and durability under all driving conditions. With dimensions of 133mm in width, 48.87mm in height, and 17.6mm in thickness, it fits seamlessly into the front axle brake system of the Chevrolet Lova. Whether in busy city traffic or on the highway, these brake pads provide a quiet, clean, and responsive braking experience.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
