

## Honda Acura MDX Ceramic Front Brake Pad Replacement D1280 45022-STX-A00

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Honda Acura MDX Wrangler Ceramic Brake Pad
- Model: Honda Acura MDX
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-07014
- F/R: F
- FMSI: D1280
- OEM: 45022-STX-A00
- Braking System: N
- Highlight: 45022-STX-A00 front brake pad replacement, Honda Acura MDX Front Brake Pad, 45022-STX-A00

## Product Description

Specifications	
Product name	Honda Acura MDX Ceramic Brake Pad
Model	Honda Acura MDX
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-07014
FMSI	D1280
OEM	45022-STX-A00
Braking System	N
Size	
Width	169.9 mm
Height	57.7 mm
Thickness	16.9 mm
Model_MARKE	Acura MDX (07 model)

**The Ceramic Brake Pad for Honda Acura MDX, model D1280, OEM part number 45022-STX-A00, F, is crafted from a premium ceramic composite material, offering exceptional braking performance and durability. Designed to meet the demands of high-performance driving, it ensures safety and stability under various driving conditions. With its low thermal conductivity and excellent thermal stability, the brake pad maintains a consistent friction coefficient even at high temperatures, providing reliable stopping power.**

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
