

Ceramic Rear Brake Pads Replacement 44060-8H385 Renault Koleos Brake Pads / X-Trail

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Renault Koleos/X-Trail Ceramic Brake Pad
- Model: Renault Koleos/X-Trail
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-19002
- F/R: R
- FMSI: D1288
- OEM: 44060-8H385
- Braking System: AKB
- Highlight: **Ceramic Rear Brake Pads Replacement, Renault Koleos Brake Pads, 44060-8H385**

Product Description

Specifications	
Product name	Renault Koleos/X-Trail Ceramic Brake Pad
Model	Renault Koleos/X-Trail
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-19002
FMSI	D1288
OEM	44060-8H385
Braking System	AKB
Size	
Width	105.4 mm
Height	37.85 mm
Thickness	13.7 mm
Model_MARKE	Koleos/ New X-Trail/ X-Trail/ FX35/ Qashqai/ Grand Vitara/ Haima S5

The Ceramic Brake Pad for Renault Koleos/X-Trail, model D1288, OEM part number 44060-8H385, R, is made with high-quality ceramic composite material, offering stable and robust braking power. With low thermal conductivity and high thermal stability, it maintains a consistent friction coefficient even under extreme driving conditions, ensuring safe and reliable braking performance. The wear-resistant and noise-reducing design provides smooth braking for Renault Koleos/X-Trail on any terrain.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
