

Mercedes_Benz CL600 005 420 89 20 Mercedes Brake Pads / Car Brake Pad

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Mercedes_Benz CL600 Ceramic Brake Pad
- Model: Mercedes_Benz CL600
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-03028
- F/R: F
- FMSI: D1291
- OEM: 005 420 89 20
- Braking System: Brembo
- Highlight: **CL600 mercedes brake pads,
CL600 car brake pad,
005 420 89 20 car brake pad**

Product Description

Specifications	
Product name	Mercedes_Benz CL600 Ceramic Brake Pad
Model	Mercedes_Benz CL600
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-03028
FMSI	D1291
OEM	005 420 89 20
Braking System	Brembo
Size	
Width	189.3 mm
Height	93.1 mm
Thickness	15.7 mm
Model_MARKE	W204/W211/W212/R230

Custom-designed Ceramic Brake Pads for the Mercedes-Benz CL600, model D1291, OEM part number 005 420 89 20, F, are made with top-grade silicon carbide ceramic composite material, ensuring the durability and longevity of the pads. These brake pads offer a stable friction coefficient and excellent thermal stability with low thermal conductivity, providing consistent braking even during high-speed driving or emergency stops, ensuring driving safety. Their low noise and reduced brake dust characteristics offer a more comfortable driving experience for the Mercedes-Benz CL600.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
