

Ford Zhisheng Front Ceramic Brake Pads D1306 1379971 Dust Free Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Ford Zhisheng Ceramic Brake Pad
- Model: Ford Zhisheng
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-10006
- F/R: F
- FMSI: D1306
- OEM: 1379971
- Braking System: Ate-Teves
- Highlight: **Ford Zhisheng ceramic brake pads,
Ford Zhisheng front ceramic brake pads,
1379971 ceramic brake pads**

Product Description

Specifications	
Product name	Ford Zhisheng Ceramic Brake Pad
Model	Ford Zhisheng
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-10006
FMSI	D1306
OEM	1379971
Braking System	Ate-Teves
Size	
Width	155.2 mm
Height	66.5 mm
Thickness	19.1 mm
Model_MARKE	2008 Ford Mondeo Zhisheng/ S-MAX/ 2007 Volvo S80/ Range Rover Evoque/ Trumpchi GX5/ 2018 Ei5

The Ceramic Brake Pad D1306, specifically designed for the Ford Zhisheng, is the top choice for superior braking performance and durability. Crafted with advanced ceramic composite materials, it delivers consistent stopping power under all driving conditions. With the product code 1379971, it is tailored for the Ford Zhisheng model, offering precision braking control comparable to F-class racing vehicles, making it a dependable companion for your drive.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
