

Highlander Toyota Brake Pad Set D1324 OEM 04465-0E010 F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Toyota Highlander Ceramic Brake Pad
- Model: Toyota Highlander
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-11018
- F/R: F
- FMSI: D1324
- OEM: 04465-0E010
- Braking System: N
- Highlight: **Highlander Toyota Brake Pad Set,
04465-0E010 Toyota Brake Pad Set,
04465-0E010**

Product Description

Specifications	
Product name	Toyota Highlander Ceramic Brake Pad
Model	Toyota Highlander
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-11018
FMSI	D1324
OEM	04465-0E010
Braking System	N
Size	
Width	167.1 mm
Height	59.3 mm
Thickness	17.6 mm
Model_MARKE	Domestic Toyota Highlander 2.7L/ 3.5L (2009 model) GSU45/ Toyota/ 2013 Toyota Sienna/ Alphard/ 2015 Highlander/ Lifan X80

The Toyota Highlander Ceramic Brake Pads, model D1324 with part number 04465-0E010, are meticulously crafted for the front axle (F), ensuring your safety and comfort on the road. These brake pads are made from advanced ceramic composite materials, offering exceptional braking performance and heat resistance. They reduce noise and dust during braking, extending their lifespan. Whether it's city driving or long-distance journeys, the Toyota Highlander Ceramic Brake Pads are an indispensable choice for your vehicle.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
