

Cadillac 2008-2009 CTS V6 3.6 Cadillac Brake Pad Set Ceramic Brake Pad 25814699

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: Production according to customer demand volume

Product Specification

- Product Name: Cadillac 2008-2009 CTS V6 3.6 Ceramic Brake Pad
- Model: Cadillac 2008-2009 CTS V6 3.6
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-16010
- F/R: F
- FMSI: D1332
- OEM: 25814699
- Braking System: N
- Highlight: **CTS V6 3.6 Cadillac Brake Pad Set, 25814699 ceramic brake pad, 2008-2009 Cadillac Brake Pad Set**

Product Description

Specifications	
Product name	Cadillac 2008-2009 CTS V6 3.6 Ceramic Brake Pad
Model	Cadillac 2008-2009 CTS V6 3.6
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-16010
FMSI	D1332
OEM	25814699
Braking System	N
Size	
Width	175.8mm
Height	60 mm
Thickness	15.4mm
Model_MARKE	Cadillac CTS (2008-2009)

The Cadillac 2008-2009 CTS V6 3.6 Ceramic Brake Pads, model D1332 with part number 25814699, are precisely engineered for the front axle (F), enhancing your driving safety and comfort. Made from high-quality ceramic materials, these brake pads offer superior braking performance and heat resistance, significantly reducing noise and dust during braking, thus extending their lifespan. Their high-temperature stability and low wear rate make them a reliable choice, cutting down on maintenance costs and boosting the vehicle's safety features.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
