

Teves 2005 420 42 20 Oem Mercedes Brake Pads Mercedes-Benz W204 Ceramic Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Mercedes-Benz W204 Ceramic Brake Pad
- Model: Mercedes-Benz W204
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-03014
- F/R: R
- FMSI: D1341
- OEM: 005 420 42 20
- Braking System: Teves
- Highlight: **W204 mercedes brake pads,
2005 420 42 20 oem mercedes brake pads,
Teves ceramic brake pads**

Product Description

Specifications	
Product name	Mercedes-Benz W204 Ceramic Brake Pad
Model	Mercedes-Benz W204
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-03014
FMSI	D1341
OEM	2005 420 42 20
Braking System	Teves
Size	
Width	122.5 mm
Height	54.3 mm
Thickness	16.9 mm
Model_MARKE	W204/X204/C207

Enhance the safety and comfort of your driving experience with the D1341 Ceramic Brake Pads for your Mercedes-Benz W204. Crafted from premium ceramic materials, these brake pads minimize wear and noise during braking, offering a more consistent braking performance. Designed for both front (F) and rear ® axles, the 2005 model 420 42 20 brake pads are engineered for high performance and durability. Whether navigating city streets or cruising on the highway, they provide exceptional braking response. Opt for the D1341 and experience optimal braking for your Mercedes vehicle.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
