

## Lucas 3C0698451F Rear Ceramic Brake Pads Volkswagen Tiguan

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T,LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Volkswagen Tiguan Ceramic Brake Pad
- Model: Volkswagen Tiguan
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-01029
- F/R: R
- FMSI: D1348
- OEM: 3C0698451F
- Braking System: Lucas
- Highlight: **lucas brake pad 3C0698451F,  
Lucas ceramic brake pads,  
Lucas rear ceramic brake pads**

## Product Description

Specifications	
Product name	Volkswagen Tiguan Ceramic Brake Pad
Model	Volkswagen Tiguan
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-01029
FMSI	D1348
OEM	3C0698451F
Braking System	Lucas
Size	
Width	105.5mm
Height	56.3 mm
Thickness	17 mm
Model_MARKE	Touran/ A6L/ New Passat/ 2013 Audi Q3 2.0T/ Phideon/ Trumpchi GS4 1.5T (manual handbrake)

Opt for the D1348 Ceramic Brake Pads with part number 3C0698451F for your Volkswagen Tiguan, meticulously engineered for the front axle (R) to enhance your vehicle's safety. These brake pads are made from superior quality ceramic materials, offering exceptional heat resistance and damping capabilities. They significantly reduce braking noise and dust, extending the lifespan of your braking system. Whether it's your daily commute or a long road trip, the D1348 brake pads ensure consistent and reliable braking power, giving you peace of mind with every drive.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
