Nissan New X-Trail Ceramic Front Brake Pad Replacement D1374 D1060-9N00A

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Nissan New X-Trail Ceramic Brake Pad
- Model: Nissan New X-Trail
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-22006
- F/R: F
- FMSI: D1374
- OEM: D1060-9N00A
- Braking System: Akebono
- Highlight: **D1060-9N00A front brake pad replacement**, **New X-Trail front brake pad replacement**, **D1060-9N00A**

Product Description

Specifications	
Product name	Nissan New X-Trail Ceramic Brake Pad
Model	Nissan New X-Trail
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-22006
FMSI	D1374
OEM	D1060-9N00A
Braking System	Akebono
Size	
Width	142 mm
Height	59 mm
Thickness	16.8 mm
Model_MARKE	Nissan Qashqai/ X-Trail T30 (2008)/ Mazda CX-5

The Nissan New X-Trail Ceramic Brake Pads, models D1374 and D1060-9N00A, are premium products designed for vehicle owners who demand superior braking performance and extended lifespan. Made with advanced ceramic materials, these brake pads deliver consistent stopping power across various driving conditions while minimizing brake dust to keep your wheels clean. Their optimized thermal conductivity ensures effective braking even at high temperatures, reducing wear on the brake system and prolonging the life of the pads. Whether navigating urban streets or embarking on off-road adventures, the Nissan New X-Trail Ceramic Brake Pads offer dependable braking safety.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
