

Hyundai Elantra Ceramic Brake Pad Rear D1398 , 58302-2LA00

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Hyundai Elantra Yuedong Ceramic Brake Pad
- Model: Hyundai Elantra Yuedong
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-28011
- F/R: R
- FMSI: D1398
- OEM: 58302-2LA00
- Braking System: N
- Highlight: 58302-2LA00, rear ceramic brake pad,
58302-2LA00 ceramic brake pad

Product Description

Specifications	
Product name	Hyundai Elantra Yuedong Ceramic Brake Pad
Model	Hyundai Elantra Yuedong
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-28011
FMSI	D1398
OEM	58302-2LA00
Braking System	N
Size	
Width	93 mm
Height	41 mm
Thickness	15 mm
Model_MARKE	Hyundai Elantra Yuedong/ Kia/ Yidong/ IX25/ Kia KX3

Upgrade your Hyundai Elantra Yuedong with our high-performance ceramic brake pads, model D1398, part number 58302-2LA00. Engineered for exceptional braking power and durability, these brake pads ensure your safety and comfort on both urban streets and rugged terrains. Opt for our ceramic brake pads and enjoy a more reliable braking experience and prolonged driving pleasure in your Elantra Yuedong.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
