

## Land Rover Range Rover 5.0T Land Rover Brake Pad Set D1426, LR016684

## **Basic Information**

Place of Origin: China
Brand Name: OEM
Certification: ISO9000
Model Number: ALL
Minimum Order Quantity: 100
Price: 5.00-25.00
Packaging Details: export packing
Delivery Time: 30-60

Delivery Time: 30-60
Payment Terms: T/T, LC
Supply Ability: 15 Million

## Product Specification

Type:

Product Name: Land Rover Range Rover 5.0T Ceramic

Brake Pad

Brake Pad

Model: Land Rover Range Rover 5.0T

Material: Ceramic
Factory No.: ZK-18007
F/R: F
FMSI: D1426
OEM: LR016684
Braking System: Erembo

Highlight: LR016684 Land Rover Brake Pad Set,
 5.0T Land Rover Brake Pad Set, LR016684

## **Product Description**

	Specifications
Product name	Land Rover Range Rover 5.0T Brake Pad
Model	Land Rover Range Rover 5.0T
Туре	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-18007
FMSI	D1426
OEM	LR016684
Braking System	Erembo
	Size
Width	189.6 mm
Height	96 mm
Thickness	15.5 mm
Model_MARKE	Land Rover Range Rover Third Generation SUV 5.0T (LM) 2002/03-/ Land Rover Range Rover SUV 3.0T 5.0T 2005/02-

Custom-designed for the Land Rover Range Rover 5.0T, the ceramic brake pads with model D1426 and part number LR016684 are the perfect upgrade for your luxury SUV. These high-performance brake pads are made with an advanced ceramic formula that delivers exceptional stopping power and heat resistance, ensuring stable braking performance under all driving conditions. With a design focused on low wear and noise reduction, not only do they extend the life of your brake pads and discs, but they also provide a quieter, more comfortable driving experience.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C. maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
