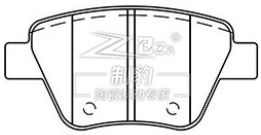
TRW Volkswagen New Bora Ceramic Car Brake Pad Replacement 5K0 698 451

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million



Product Specification

- Product Name: Volkswagen New Bora Ceramic Brake Pad
- Model: Volkswagen New Bora
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-01009
- F/R: F
- FMSI: D1456
- OEM: 5K0 698 451
- Braking System: TRW
- Highlight: **5K0 698 451 car brake pad**, **5K0 698 451 car brake pad replacement**, **TRW car brake pad replacement**

Product Description

Specifications	
Product name	Volkswagen New Bora Brake Pad
Model	Volkswagen New Bora
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-01009
FMSI	D1456
OEM	5K0 698 451
Braking System	TRW
Size	
Width	109.2 mm
Height	53.6 mm
Thickness	16.5 mm
Model_MARKE	New Bora/ New Golf

The Volkswagen New Bora Ceramic Brake Pads, model D1456 and part number 5K0 698 451, offer a robust safeguard for your driving safety. Made from premium ceramic materials, these brake pads boast excellent heat resistance and durability, providing stable and powerful braking performance under various driving conditions. The low noise and dust characteristics ensure a comfortable driving experience while minimizing environmental impact. Whether for daily commuting or long-distance travel, the ceramic brake pads for Volkswagen New Bora are an indispensable high-performance choice.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
