

Rear Citroën Xsara Ceramic Brake Pad 4250.42 brake discs and pads set

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Citroën Xsara Yuedong Ceramic Brake Pad
- Model: Citroën Xsara
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-26006
- F/R: R
- FMSI: D1458
- OEM: 4250.42
- Braking System: BNX
- Highlight: rear ceramic brake pad,
4250.42 ceramic brake pad,
Rear brake discs and pads set

Product Description

Specifications	
Product name	Citroën Xsara Ceramic Brake Pad
Model	Citroën Xsara
Type	Brake Pad
Material	Ceramic
F/R	R
Factory No.	ZK-26006
FMSI	D1458
OEM	4250.42
Braking System	BNX
Size	
Width	105 mm
Height	54.87 mm
Thickness	10.5 mm
Model_MARKE	Citroën Xsara/ Renault/ Peugeot/ Fengshen H30/ with middle nail lower

Ceramic Brake Pads designed specifically for the Citroën Xsara, model D1458, with OEM part number 4250.42, offer optimal braking performance and durability for your vehicle. Made from high-quality ceramic materials, these brake pads reduce noise and brake dust during operation, while also providing excellent heat resistance and a longer lifespan. Whether navigating through urban traffic or cruising on the highway, the Citroën Xsara's ceramic brake pads ensure your driving safety, making your journey smoother and more comfortable.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
