

Renault Scenic Gen-2 Disc Brake Pad Set D1495 77 01 207 184 front

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Renault Scenic Gen-2 Ceramic Brake Pad
- Model: Renault Scenic Gen-2
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-19003
- F/R: F
- FMSI: D1495
- OEM: 77 01 207 184
- Braking System: BOS
- Highlight: **front Disc Brake Pad Set,
Gen-2 front brake pad set, 77 01 207 184**

Product Description

Specifications	
Product name	Renault Scenic Gen-2 Brake Pad
Model	Renault Scenic Gen-2
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-19003
FMSI	D1495
OEM	77 01 207 184
Braking System	BOS
Size	
Width	136.75 mm
Height	59.41 mm
Thickness	17.3 mm
Model_MARKE	Renault Scenic Gen-2

Ceramic Brake Pads tailored for the Renault Scenic Gen-2, model D1495, OEM part number 77 01 207 184, provide unparalleled safety and comfort for your driving experience. These brake pads are made with premium ceramic materials, significantly reducing brake noise and dust production, while offering exceptional heat resistance and a longer lifespan. Whether navigating through busy city traffic or cruising on open country roads, the Renault Scenic Gen-2's ceramic brake pads ensure your travel safety, making your journey smoother and more enjoyable.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
