

13301207 Front Brake Pad Set D1497 Chevrolet Cruze Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Chevrolet Cruze Ceramic Brake Pad
- Model: Chevrolet Cruze
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-27008
- F/R: F
- FMSI: D1497
- OEM: 13301207
- Braking System: N
- Highlight: chevy cruze brake pads 13301207,
front chevrolet cruze brake pads, 13301207

Product Description

Specifications	
Product name	Chevrolet Cruze Brake Pad
Model	Chevrolet Cruze
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-27008
FMSI	D1497
OEM	13301207
Braking System	N
Size	
Width	148 mm
Height	60.3 mm
Thickness	17.9 mm
Model_MARKE	Chevrolet Cruze 1.6L/1.8L/ Buick Excelle XT/GT/ Cruze 2015 Classic

Delphi OEM Front Brake Pads for the Chevrolet Cruze, model D1497, part number 13301207, offer superior braking performance and durability for your vehicle. Made from high-quality materials, these brake pads ensure long-lasting reliability and safety. Whether it's city driving or long-distance journeys, the Delphi OEM Front Brake Pads for the Chevrolet Cruze provide consistent stopping power and excellent heat resistance, ensuring a smooth and secure driving experience.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
