

Fiat Stilo Brake Pads 77362093 Front Brake Pad Replacement

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Fiat Stilo Ceramic Brake Pad
- Model: Fiat Stilo
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-30007
- F/R: F
- FMSI: D1519
- OEM: 77362093
- Braking System: BOS
- Highlight: front brake pad replacement 77362093,
front fiat stilo brake pads, 77362093

Product Description

Specifications	
Product name	Fiat Stilo Brake Pad
Model	Fiat Stilo
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-30007
FMSI	D1536
OEM	77362093
Braking System	BOS
Size	
Width	151 mm
Height	57.5 mm
Thickness	18.3 mm
Model_MARKE	Fiat Stilo/ Hatchback 1.9/2.4 (2001/10-)/ Fiat Stilo Wagon 1.9 (2003/01-)

Front brake pads specifically designed for the Fiat Stilo, model D1536, part number 77362093, ensure your driving safety. These brake pads are manufactured using advanced processes and high-standard materials, guaranteeing exceptional braking performance and durability. Whether navigating through busy city streets or cruising on the highway, the front brake pads for the Fiat Stilo provide stable and reliable stopping power, instilling confidence in every drive.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
