

## Fiat Siena 2005 Disc Brake Pad Set 9948131 ATE Ceramic Brake Pad

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

### Product Specification

- Product Name: Fiat Siena 2005 Ceramic Brake Pad
- Model: Fiat Siena 2005
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-30002
- F/R: F
- FMSI: D1538
- OEM: 9948131
- Braking System: ATE
- Highlight: **Fiat Siena 2005 Disc Brake Pad Set,**  
**Fiat Siena brake pad set, 9948131**

## Product Description

Specifications	
Product name	Fiat Siena 2005 Brake Pad
Model	Fiat Siena 2005
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-30002
FMSI	D1538
OEM	9948131
Braking System	ATE
Size	
Width	151.2 mm
Height	52.53 mm
Thickness	16.8 mm
Model_MARKE	Nanjing Fiat Palio 1.3/1.5 (2002/01-)/ Fiat Palio 1.2/1.6/1.7 (1996/04-)

Front brake pads designed specifically for the Fiat Siena 2005, model D1538, part number 9948131, deliver optimal braking performance for your vehicle. These brake pads are manufactured to high standards, ensuring superior wear resistance and long-term reliability. Whether in congested city traffic or on the highway, the front brake pads for the Fiat Siena 2005 provide stable and robust stopping power, ensuring your safety on the road.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
