

77362092 Fiat Multipla Brake Pads / Front Ceramic Brake Pads

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Fiat Multipla Ceramic Brake Pad
- Model: Fiat Multipla
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-30001
- F/R: F
- FMSI: D1618
- OEM: 77362092
- Braking System: BOS
- Highlight: Fiat Multipla ceramic brake pad,
77362092 front ceramic brake pads, 77362092

Product Description

Specifications	
Product name	Fiat Multipla Brake Pad
Model	Fiat Multipla
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-30001
FMSI	D1618
OEM	77362092
Braking System	BOS
Size	
Width	137 mm
Height	57.4 mm
Thickness	18 mm
Model_MARKE	Fiat Multipla/ Zotye Langyue/ Geely Emgrand EC7

Front Axle Brake Pads for Fiat Multipla, model D1618, part number 77362092, are crafted with high manufacturing standards to ensure superior braking performance and durability. With a width of 137 mm, height of 57.4 mm, and thickness of 19 mm, these brake pads are compatible with various Fiat and Lancia models, making them a trustworthy component for your vehicle's braking system.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
