

2006 Fiat Bravo 1.4T BOS Braking System Front Brake Pads 7 736 227

1

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: 2006 Fiat Bravo 1.4T Ceramic Brake Pad
- Model: 2006 Fiat Bravo 1.4T
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-30013
- F/R: F
- FMSI: D1620
- OEM: 7 736 227 1
- Braking System: BOS
- Highlight: **7 736 227 1, 1.4T front brake pads, 2006 Fiat Bravo front brake pads**

Product Description

Specifications	
Product name	2006 Fiat Bravo 1.4T Brake Pad
Model	2006 Fiat Bravo 1.4T
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-30013
FMSI	D1620
OEM	7 736 227 1
Braking System	BOS
Size	
Width	95 mm
Height	42.8 mm
Thickness	15.7 mm
Model_MARKE	Fiat Bravo II 2006/11-/ Fiat Linea 2007/06-/ Fiat Multipla MPV (186) 1999/04-2010/06/ Fiat Stilo Hatchback (192) 2001/10-2010/11/ Fiat Stilo Wagon (192) 2003/01-2008/08/ Lancia Delta III (844) 2008/08-/ Alfa Romeo MiTo (955) 2008/09-

Front Axle Brake Pads for the 2006 Fiat Bravo 1.4T, model D1620, part number 7 736 227 1, are crafted with high manufacturing standards to ensure superior braking performance and durability. With a width of 155.1 mm, height of 66.5 mm, and thickness of 20.3 mm, these brake pads are compatible with the Fiat Bravo and other models, making them a trustworthy component for your vehicle's braking system.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
