Chevrolet Sail,Ceramic Brake Pad,D1644, 89062189,F

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

Product Specification

- Product Name: Chevrolet Sail Ceramic Brake Pad
- Model: Chevrolet Sail
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-27010
- F/R: F
- FMSI: D1644
- OEM: 89062189
- Braking System: N
- Highlight: **89062189 ceramic brake pad**, **89062189 ceramic brake pads**, **chevrolet sail ceramic brake pad**

Product Description

Specifications	
Product name	Chevrolet Sail Brake Pad
Model	Chevrolet Sail
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-27010
FMSI	D1644
OEM	89062189
Braking System	N
Size	
Width	141 mm
Height	48.3 mm
Thickness	15.6 mm
Model_MARKE	2001-2005 models

Chevrolet Sail High-Performance Brake Pads, model D1644, part number 89062189, are designed to enhance your driving safety. These brake pads are made with advanced ceramic composite materials, ensuring consistent stopping power and exceptional wear resistance under all driving conditions. Whether navigating congested city streets or cruising on open highways, our brake pads deliver reliable safety you can trust.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35, coupled with heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
