

2015 S350/W205/SL550 2013) Mercedes Benz Front Brake Pads 006 420 49 20

Basic Information

. Place of Origin: China . Brand Name: OEM · Certification: ISO9000 Model Number: ALL • Minimum Order Quantity: 100 • Price: 5.00-25.00 · Packaging Details: export packing • Delivery Time: 30-60

Delivery Time: 30-60
Payment Terms: T/T, LC
Supply Ability: 15 Million

Product Specification

Type:

• OEM:

Product Name: 2015 Mercedes-Benz

S350/W205/SL550 2013) Ceramic Brake

Pad

Brake Pad

006 420 49 20

Model: 2015 Mercedes-Benz

S350/W205/SL550 2013)

Material: Ceramic
 Factory No.: ZK-03049
 F/R: F
 FMSI: D1670

Braking System:

Highlight: mercedes benz front brake pads,

2015 mercedes benz front brake pads, S350 mercedes benz front brake pads

Product Description

	Specifications
Product name	2015 Mercedes-Benz S350/W205/SL550(2013) Brake Pad
Model	2015 Mercedes-Benz S350/W205/SL550(2013)
Туре	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-03049
FMSI	D1670
OEM	006 420 49 20
Braking System	N
	Size
Width	134.6mm
Height	87.4 mm
Thickness	16.9 mm
Model_MARKE	2015 Mercedes-Benz S350/W205/SL550(2013)

The 2015 Mercedes-Benz S350/W205/SL550 High-Performance Brake Pads, model D1670, part number 006 420 49 20, provide a solid safety foundation for your luxury driving experience. These brake pads are crafted with advanced ceramic composite materials, offering exceptional heat resistance and a stable friction coefficient, ensuring precise braking under various driving conditions. Our brake pads deliver lasting and reliable braking performance in busy urban traffic or on the

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C. maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
