

## Chery A3,Ceramic Brake Pad,D1674A,A21-6GN3501080BA,F

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: OEM
- Certification: ISO9000
- Model Number: ALL
- Minimum Order Quantity: 100
- Price: 5.00-25.00
- Packaging Details: export packing
- Delivery Time: 30-60
- Payment Terms: T/T, LC
- Supply Ability: 15 Million

#### Product Specification

- Product Name: Chery A3 Ceramic Brake Pad
- Model: Chery A3
- Type: Brake Pad
- Material: Ceramic
- Factory No.: ZK-36003
- F/R: F
- FMSI: D1674A
- OEM: A21-6GN3501080BA
- Braking System: N
- Highlight: **a21-6gn3501080ba ceramic brake pad,  
a21-6gn3501080ba ceramic brake pads,  
chery a3 ceramic brake pad**

## Product Description

Specifications	
Product name	Chery A3 Brake Pad
Model	Chery A3
Type	Brake Pad
Material	Ceramic
F/R	F
Factory No.	ZK-36003
FMSI	D1674A
OEM	A21-6GN3501080BA
Braking System	N
Size	
Width	131.6 mm
Height	55.4 mm
Thickness	16.7 mm
Model_MARKE	Without wire is New Tiggo/ With wire is Old Chery A5 1.6/ Chery A5 (New model)/ Chery A3/ Huansu H3/ Arrizo 5/ Huansu S6/ 2017 Emgrand Million Edition with side hole/ New Huansu S3L with middle hole

Rear Brake Pads for Chery A3, model M11-3502090, are manufactured with high-quality materials to ensure stability and safety during braking. These brake pads are precisely sized to fit the front brake system of the Chery A3, offering excellent braking performance and durability. Whether it's city driving or long-distance travel, they provide reliable braking power to ensure the safety of you and your family.

Our ceramic brake pads, crafted from a specially formulated ceramic blend, showcase exceptional performance owing to their unique material composition.

The manufacturing process adheres to the rigorous standards of international certification IATF-16949, ensuring the utmost reliability in product quality.

Withstanding temperatures of up to 640°C, our ceramic brake pads offer a reliable safeguard for braking needs under diverse driving conditions.

Employing original high-precision molds and specialized heat treatment techniques, we guarantee the precision and stability of our products.

Addressing brake squeal concerns, our pads boast a friction coefficient of PS 0.35 and heat resistance up to 640°C, maintaining outstanding braking performance even in high-temperature environments. This prolongs lifespan and effectively resolves brake squeal issues.

Prioritizing safety and comfort, our stable friction coefficient preserves brake disc integrity, while the comfortable pedal feel and low-noise design enhance driving pleasure and reduce environmental pollution.

Featuring unique chamfered edges, our pads not only reduce braking noise but also enhance compatibility with counterpart components, further elevating braking performance.

Exceptional heat dissipation performance is achieved through high-temperature and high-pressure burnishing, reducing bedding-in periods and minimizing noise occurrences, thereby enhancing pad cooling efficiency and ensuring braking stability and safety.

Designed for lightweight, our ceramic brake pads, compared to traditional metal ones, effectively reduce vehicle load, improving fuel economy and power performance.

Minimizing brake dust, our ceramic brake pads produce less dust compared to their metal counterparts, making them environmentally friendly and less intrusive to the cleanliness of the vehicle surroundings and wheels.

Quality assurance is paramount to us. Through stringent quality controls and continuous research and development efforts, we ensure the stability and reliability of each ceramic brake pad, earning the trust and acclaim of our users.
